

Project Report

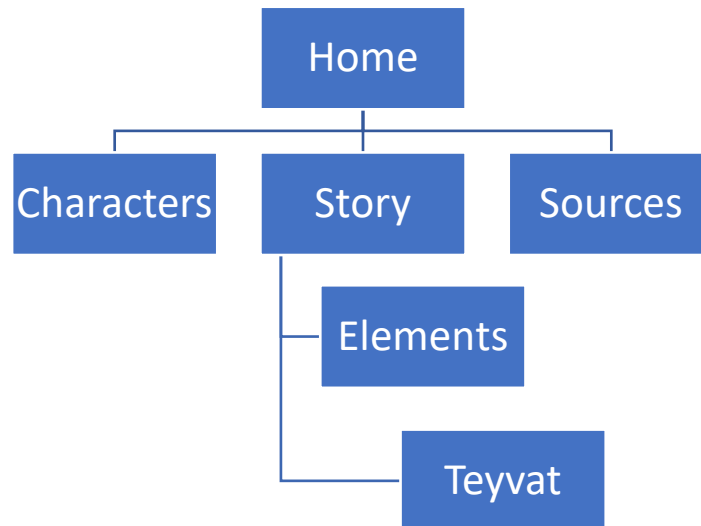

1. Title of the Project

Genshin Impact

2. Brief description of the project

A website that briefly introduces the game Genshin Impact. Aspects of the game's development, storyline, storyline characters, and the world of Genshin are touched on.

3. Sitemap

4. Wireframe/Structure of each webpage

The Home web page displays information about the release of the game and its developers and publishers. It also contains the story of the game: the setting, main character. Includes a video/ tutorial introducing the visuals and the fundamentals of the game. There's a "Return to top" button included at the bottom of the page.

The Character web page contains a select list where you can select a character and it will display some details about the characters origins and skills. Using JavaScript functions, arrays, and styles to display different images and descriptions based on the character that

was selected. External YouTube videos are also included at the bottom to introduce two of the characters shown on the select list. A “Return to top” button is included at the bottom of the page.

The Story web page includes some more information about the elements in the game and how each element is related to each major nation in the story of the game. Using JavaScript loops, conditions, and arrays. This web page also displays the map of Teyvat and the Main cities introduced from each country.

The Sources web page contains all the sites we used for research, photos and the original YouTube links for the videos contained in each page.
